

Miller Stretchable 1.5M Manyard with 2 Karabiners

Product Images

Description

A fall arrest Lanyard or Manyard is used where there is a definite fall hazard and contains a shock absorber to dissipate the forces on the body in case of a fall

- A unique stretchable design for greater freedom of movement and safety
- When contracted, it greatly reduces the risk of tipping, snapping and dragging
- 1.5 meters in length
- Reliable visual inspection
- Special woven shock-absorbing inner core
- Unique warning flag provides visual proof that a lanyard has been involved in a fall
- The integrated core becomes visible if the outer jacket is damaged or worn and unfit for service
- Hi-tech protective finish on outer tubular jacket prolongs the service life of the Manyard
- Supplied with a pull away connection clip that attached to the harness to hold the manyard when not in use, thus limiting tripping risks
- Comes with two galvanised connectors (CS20)
- EN335
