

Superior UltraSolv Semi-Flexible Swabs

Product Images

Description

The Superior UltraSolv Semi-Flexible Swabs feature high strength and abrasion resistant foam tip minimising particle shedding due to abrasion, common with standard swabs

- Extremely low ionic and NVR levels
- Less than 2000 .5µ to 25µ particles per swab
- Thermally bonded to ensure no adhesive residue and minimum particle generation
- Handle Material: Polypropylene
- Handle colour: Blue
- Head Material: UltraSolv Foam
- Unit: Pack 500
- ESD-Safe versions available with static dissipative swab tip and handle
