

3M Versaflo Powered Air Turbo Unit

Product Images

Description

The 3M Versaflo Powered Air Turbo Unit combines performance, protection and functionality with modern, stylish, lightweight design and unrivalled comfort. The Versaflo Powered Air Turbo Unit offers respiratory protection against dust, mists, fumes and other particulate hazards, as well as nuisance-level organic vapour and acid gas

- Supplies air to the wearer's breathing zone allowing them to work safely and comfortably
- Two selectable flow rate options of 185 l/min and 205 l/min
- Combines with other Versaflo components to build a complete system
- Light and small - extremely slim, lightweight, balanced design for outstanding comfort, even over long periods of time
- Features an intelligent lithium ion battery that charges quickly, has no memory effect and incorporates a useful charge indicator
- Electronic audible and visual alarm in case of low battery and/or low air flow
- Easy to adjust and maintain
- Approved to EN12941, Class TH2 or TH3 dependent on the headtop
