

Knipex Diagonal Cutters Multi Component Grip

Product Images

Description

Knipex have used special tool steel construction with moulded multi component handles for added comfort, durability and, most importantly, added grip

- Constructed from chrome vanadium forged top quality steel with precision non-slip tips for added strength and durability
- Manufactured with high quality material and precise workmanship for long service life
- Clean cutting at cutting edge tips and narrow head style for use in confined areas
- Manufactures from vanadium electric steel, oil-hardened and tempered
- The edge hardness is approximately 62 HRC, which is ideal for cutting soft wire close to a flat surface with the bevelled blade
- The cutters have polished heads and plastic PVC-dipped coated cushion grip handles for added durability and comfort
