

JSP 4-Gated Reflective Barriers

Product Images

Description

The JSP 4-Gated Reflective Barrier is a tough and durable barrier ideal for contract work. The 4-Gated Reflective Barrier's fully reflective panels offer enhanced security and visibility, making it the ideal safety solution for controlling crowds, directing pedestrians and restricting passage

- Chapter 8, fully reflective top panel meets EN12899-1 requirements
- 4 barriers are linked by fully flexible, black clips
- Handles with finger grip moulds for easy and safe manoeuvring of barriers
- Space for contractor branding/details to be applied by decal transfer
- Can also be formed into a square or triangle shape to deter pedestrians from danger zones
- Locating holes allow signs to be fitted to barrier
- Barriers contain no metal parts, making them ideal for use in electrical environments
- Barrier Dimensions: 1000mm x 840mm x 30mm
- Weight: 2.85kg
