

Superior Poly Foam Hand Sponge

Product Images

Description

The Superior Poly Foam Hand Sponge has been designed specifically for general purpose cleaning in critically controlled and laboratory environments. It offers wipe-to-dry performance and fluid release. The sponge is ideal for spill control due to its low particle count and solvent compatibilities. They are also compatible with gamma, ETO and autoclave sterilization – up to 250° for 30 minutes.

- Designed for maximum abrasion resistance
- Resistant to a wide range of chemicals
- Helps to prevent product and cleanroom contamination
- Unique foam blend provides excellent durability
- Ideal for application where high absorbency and low extractables are prime considerations
- 320MM x 160MM x 80MM
