

Texwipe CrushTube IPA Swabs

Product Images

Description

Texwipe's CrushTube™ IPA Swabs have been manufactured from 100% hydroentangled polyester that has been enclosed in a protective casing where it is attached to an internal vial. This vial contains 91% IPA/9% DIW Solution, that when crushed saturates the head of the swab for point-of-use application

- IPA solution remains separate from head of swab until needed
- Perfect for precision cleaning and maintenance of ion emitter tips
- Ideal for cleaning sensitive surfaces and removing build-ups of adhesives
- Suitable for use in critical cleanroom environments
- Individually packaged and lot coded for quality control and traceability
- Polyester tip with ampule reservoir of 0.50ml 91% IPA/9% DIW
