

Micronova Autoclave Indicator Tape

Product Images

Description

The Micronova Autoclave Indicator Tape is a simple and precise way of confirming a completed sterilisation cycle in both gravity discharge and vacuum autoclaves. Designed with non-erasable indicator lines that change from green to black when maximum levels of steam pressure and temperature have been reached, the Micronova Autoclave Indicator Tape stays in place through steam pressure and is also easy to remove after use

- Colour: Natural with printed green indicator lines
- Non-erasable lines that won't contaminate instruments
- Lead and latex-free
- Meets European standard EN ISO 11140-1:2009
- Roll length: 60 yards / 55m on Plastic Core
