

3M 2000 Series Particulate Filters (2128, 2138)

Product Images

Description

The 2000 Series Particulate Filters can provide comfortable protection against solid particles, nuisance-level organic vapours and organic gas. The 2000 Series Filters offer low breathing resistance and comfort. These filters can fit directly onto the facepiece

- **3M Particulate Filter P2R G+V** - These Filters offer P2R protection against solid and liquid particles, extra protection against nuisance-level organic vapours and acid gas as well as ozone up to 10 x OEL. These filters are ideally used for protection in hazardous environments
- **3M Particulate Filter P3R G+V** - These Filters offer P3R protection against solid and liquid particles, and ozone up to 10 x OEL. The Filters also offer additional protection against organic vapour and gases below OEL.
