

3M 6000 Series Half Masks

Product Images

Description

The 6000 Series Half Face Mask Respirator uses the twin light weight filters fitted simply with a bayonet attachment system, meaning it requires little maintenance. The 6000 Series Half Face Masks are compatible with a range of filters to suit individual needs

- Light and easy to use protection against gases, vapours and fine particulates
- Made with elastomeric material that is designed to be comfortable for wearing over long periods of time
- Twin-filter design evenly distributes weight across the mask
- Low profile for minimal impact on field of vision and better compatibility with welding and grinding shields
- Cradle head harness and easy-fasten neck strap
- Can be fitted to a supplied air device
- EN140 FFP2. CE Marked
- Low maintenance and easy to handle
- Filters sold separately - compatible with 3M 2000, 5000 and 6000 Series filters (except 3MM6098 - filter type AXP3 NR and 3M6099 - filter type A2B2E2K2HGP3 R +)
