

3M Versaflo Breathing Tubes

Product Images

Description

The 3M Versaflo Breathing Tubes connect the air source to the headtop, ensuring clean air reaches the headtop efficiently with unrestricted airflow. The Versaflo Breathing Tubes feature an integrated quick release swivel, allowing for one-handed connection and release for ease of use

- Suitable for use with 3M Versaflo Headtops and Air Delivery Units
- The Versaflo BT-30 Length Adjusting Breathing Tube has a self-adjusting length for improved fit for all wearers and to reduce risk of catching and snagging
- The Versaflo BT-40 Heavy Duty Breathing Tube is robust with high durability for heavy industrial application and/or applications where hot particles may be present
