

Ansell Therm-A-Knit Gloves

Product Images

Description

The Therm-A-Knit gloves are lightweight and seamless gloves made from automatic knit technology construction which optimises wearer comfort.

- Faster drying than cotton, eliminating moisture from the skin and maintaining comfort
- The hollow core fibres provide thermal insulation in all weather conditions
- Washable at 40°C, helping to ensure hygiene
- Can be used in a variety of working environments including utilities, construction, fishing and general maintenance.
- Length: 260 mm
- Knitted style wrist cuff provides additional wear comfort

Ansell is a global leader in protection solutions. They design, develop and manufacture a wide range of hand and arm protection solutions, and clothing.
