

Dependable Speed Ramps

Product Images

Description

The Dependable Speed Ramps are ideal for making roads and neighbourhoods safer for all road users and pedestrians. The Speed Ramps are made from recycled thermoplastic material, guaranteeing durability and longevity in any conditions

- Manufactured from a combination of tough recycled and virgin material
- Ramps and end caps are supplied in black or high visibility yellow for maximum contrast visibility
- Easily aligned during installation due to dog-bone locators
- Can withstand HGVs up to 44 tonnes
- Built-in white reflectors for improved night-time visibility
- Provides reduction in traffic speed of between 5 and 20mph
- Image shows several ramp pieces aligned together
