

Loctite Output Kit

Product Images

Description

Thermally conductive adhesive for bonding electronic components to heat sinks or PCBs. High thermal conductivity provides excellent heat dissipation. Cures rapidly at room temperature. Self-shimming property produces a consistent 0.15mm film of adhesive providing electrical insulation while the controlled strength permits repairs

- Typical applications: Bonding electronic components such as heat-generating processors, bonding heat sinks to PCBs
- Kit contains 25ml syringe of adhesive and 18ml brush top activator
