

Ideal Custom Stripmaster for General Purpose Plastic

Product Images

Description

The Ideal Custom Stripmaster for General Purpose Plastic strips wire clean with a single squeeze. The Custom Stripmaster features cushioned, comfort grip handles for an ergonomic hold

- For Teflon and other "tough" insulations. Precision die-type blades handle general purpose and hard-to-strip insulations such as teflon and fibreglass
- Wire stripper neatly cuts and removes insulation with easy "one-squeeze" action and handles solid and stranded wire from 10 to 30 AWC
- Unique precision die-type blade construction combined with extreme holding power of jaws permits fast, accurate stripping without marking insulation
- Easy to use. Just insert wire between blades to desired strip length, squeeze handles, and release. Stripper has a sturdy die-cast frame and comes with comfort-grip handles
- Two options available: Stripmaster for General Purpose Plastic, or Type EE 1000V Teflon
