

Ideal Stripmaster Wire Strippers

Product Images

Description

The Ideal Stripmaster Wire Stripper series are general purpose and commercial stripping equipment suitable for a series of stripping requirements. The lightweight wire strippers are composed of 100% zinc for durability and resistance against corrosions

- Knife-type blades handle general purpose and commercial wire stripping (solid and stranded) from 8 to 30 AWG without nicking or fraying. Wire stripper has automatic, single-squeeze operation. This automatic feature holds jaws open after stripping to permit removal of wire and prevent crushing
- Stripper has a sturdy die-cast frame and comes with comfort-grip handles. Blades can be changed with the removal of only two screws
- The Stripmaster, the workhorse of industry, is 7" long and delivers a strip length of up to 7/8". An optional wire stop is available
