

Justrite Polyethylene Safety Cans

Product Images

Description

The Justrite Polyethylene Safety Cans are constructed from high-density polyethylene, designed to endure tough acids and corrosives in addition to withstanding great heat. Resistant to punctures and dents, the Justrite Polyethylene Safety Cans are ideal for transporting harmful and dangerous liquids

- Non-metallic, polyethylene safety cans with stainless steel hardware and flame arrester for optimum chemical resistance
- Self-closing cap with pressure relief mechanism and flame arrester to prevent ignition sources from entering can
- Heat, dent, puncture and chip resistant construction
- 2.5 Gallon (9.45 Litre) or 5 Gallon (18.9 Litre) capacities available
