

Justrite Type II Steel Safety Cans

Product Images

Description

The Justrite Type II Steel Safety Cans have two openings for optimal user convenience - one for pouring and one for filling. The flexible built-in metal hose on the Type II Steel Safety Cans is ideal for spill free pouring, and the swinging handle makes for easy handling over heavier loads

- Heavy-duty terne plate construction
- Two openings: one for pouring and one for filling
- Built-in flexible metal hose ideal for smooth, accurate, spill-free pouring into small openings
- Swinging handle for easy handling of heavier loads
- Fill spout automatically vents pressure when it reaches 5 psig
- Protects against explosion or rupture under fire conditions
- Free-flow flame arrester in opening dissipates heat to protect contents from fire
