

Lakeland Pyrolon Plus 2 Coveralls

Product Images

Description

The Lakeland Pyrolon Plus 2 Coverall is an effective garment at providing protection against flames and heat, and meets the requirements of EN 14116 (index 1). The Pyrolon Plus 2 Coverall fabric features intrinsic anti-static properties with very low surface resistance, and unlike other standard disposables, the anti-static will not wear off in use

- Elasticated hood, waist, cuffs and ankles
- Features Lakeland's special "Super-B" ergonomic design for optimum fit, durability and freedom of movement
- Can safely be used over thermal protective garments without compromising on thermal protection
- Serged seam
- Three-piece hood, inset sleeves and two-piece crotch gusset
- Suitable against Type 5 & Type 6 hazards
