

Loctite 3616 Chipbonder Surface Mount Adhesives

Product Images

Description

Loctite 3616 is a red epoxy adhesive designed for the bonding of surface mounted devices to printed circuit boards prior to wave soldering. Loctite 3616 is available in cartridge form and is particularly suited to printing a range of dot heights with one stencil thickness

- Chemical type - epoxy
- One component - no mixing required
- High wet strength
- Dispense method - stencil print
- SMD components to PCB
- Appearance uncured - red viscous paint
