

No Risk New Boston Safety Boots

Product Images

Description

The No Risk New Boston Safety Boots are a stylish safety boot with a steel toecap for maximum protection. The Clima Cork System featured in the New Boston Boots provides an extra layer of comfort for the wearer, while also helping to reduce fatigue by supporting the wearer's whole foot and distributing weight and pressure evenly

- Steel toecap resistant at impact 200J and compression 15kN
- Steel protected insert with penetration resistance at 1100N
- Double density PU outsole
- Water penetration and water absorption leather
- Anti-vibration, anti-static, lateral stability
- Black full grain leather
- Clima Cork System
- Conforms to EN ISO 20345
- S3 SRC
