

Pelstor Heavy Duty Pallet Racking Add-on Bay

Product Images

Description

- Versatile, efficient and cost effective pallet racking for storing palletised unit loads
- It consists of upright frames and horizontal beams that interlock to form the racking structure
- Each pallet is individually accessible
- Safety pin device on beam ends to prevent accidental beam removal
- Supplied as starter bay or Add-on bays suitable for 1200 x 1000mm standard pallets or 1200 x 800mm for Euro style pallets with the correct safety clearance for the use of mechanical pallet handling
- Extra beams available if required
- Frames and beams come in a galvanised finish
- 900mm Deep Pallet Racking for Standard Pallets 1200mm x 1000mm
- 1100mm Deep Pallet Racking for Euro Pallets 1200mm x 800mm
