Scafftag Safe Working Load (SWL) Test Insert

Product Images

Description

Scafftag's Microtag® is a safety system for identifying small plant, equipment and lifting gear. Colour coded and date qualified, the system can also render equipment in a 'prohibition status' should it be found to be faulty between inspection dates

- Microtag® also forms a clear and highly visible harness safety system
- Helps to manage the risk of HAVS (Hands Arm Vibration Syndrome) by making vital information available about the status of equipment at the point of use
- Available in Red, Blue or Yellow
- Polypropylene
- Insert only - holders available separately
- Sold individually
