Walther Foldable/Returnable Containers- ESD

Product Images

Description

Faltbox's innovative folding containers provide remarkable space-saving volume reductions. Empty containers quickly and simply fold down into secure, compact units. Up to 80% volume reductions are achieved, reducing storage and transport costs. Expanding the containers for use again is equally quick and simple. These Faltboxes are made from black conductive material to ensure they are ESD suitable.

- The ISO modular size range and vertical interior walls allow full use of the available capacity of pallet and containers
- Robust construction, hinged lips, tamper-evident security stoppers and individual container identification systems provide excellent protection
- More than 50 variations are available which are capable of solving almost any packaging or distribution requirement. Contact us for full list of available sizes
- Quick and easy folding and unfolding of containers provides ergonomic advantages
- Long service life
- ESD properties that allow safe handling of static-sensitive items
- Recyclable and environmentally friendly
