

Ambersil Freezer/2

Product Images

Description

Ambersil Freezer/2 is a rapid cooling agent, suitable for locating faults in electronic components and cooling thermally sensitive parts whilst soldering or calibration processes. Formulated without the use of CFCs or HCFCs, Freezer/2 is EU F-Gas compliant and non-flammable (according to directive 2008/47/EC)

- 400ml
- Can be used on printed circuit boards, transistors, condensers, and intermittent dry joint connectors
- Can also be used for shrink fitting of metal assemblies and embrittlement of sticky materials to aid removal
- Component temperature reduces at -50°C
