

Solbest EC 1201 Soldering System

Product Images

Description

- Modified Weller soldering irons
- Solder is automatically fed through soldering iron body and dispensed at tip through a guide tube
- This leaves the operators hands free to hold PCBs components etc
- Wire flow is activated by a pro switch on the soldering iron handle
- For use with solder wire 0.7 - 1.2mm thick
- Units come complete with modified soldering iron, solder dispensing module, and solder guide tube
- Units powered by appropriate 24V Weller soldering stations
