

Prempak Corriboard

Product Images

Description

- Corriboard is the most commonly used temporary sign material
- Fluted polypropylene sheet, relatively inexpensive and extremely durable
- With its twin wall hollow structure this makes the sheet lighter than most comparable materials
- Chemical and water resistant, suitable for indoor and outdoor use
- It has many applications including signage, posters, exhibition stands and custom packing boxes
- Available thickness – 4mm, 6mm, and 9mm
- POA (Price on Application) and MOQs apply. Please contact our Customer Service team for information on pricing and MOQs
