

AlcoSense Single Use Breathalyser

Product Images

Description

The AlcoSense Single Use Breathalyser has been designed to accurately alert three different levels of intoxication. With a snap-off top and bottom to deter contaminants from the unit until use, the AlcoSense Single Use Breathalyser is lighter than a cigarette, making it easy to transport

- Accurately indicates level of intoxication in 2 minutes
- Contains white silica crystals to act as a barrier to the environment
- Accurately measures quantity of breath entering the unit by using a blow bag
- Glass tubing to ensure crystals are unaffected by chemicals normally produced by plastic tubes
- Displays levels at:
 - 0.2‰BAC for the Irish Professional Driver and Eastern Europe Limits
 - 0.5‰BAC for the Scottish, Irish and Continental European Limit
 - 0.8‰BAC for the English and Welsh limit
