

Aim-TTi 1GHz Synthesised RF Generator

Product Images

Description

- 10MHz to 1000MHz frequency range
- 1kHz setability at any frequency
- ± 2 ppm accuracy over 5°C to 40°C
- -127dBm to 7dBm amplitude range
- Amplitude control in 0.1dB steps
- FM modulation, internal or external
- 80 character back-lit LCD display
- Keyboard and rotary encoder control
- Non-volatile storage for 9 user set-ups
- Full remote control via RS-232 or GPIB
- Outstanding price/performance ratio
- Full Specifications on Application
