

# Aim-TTi 3MHz Function Generator

## Product Images

---

## Description

---

- 0.03Hz to 3MHz frequency range
- Simultaneous display of freq. & amplitude
- External seven digit 120MHz counter
- High waveform quality at all frequencies & levels
- 2mV to 20V pk-pk from 50  $\Omega$  or 600  $\Omega$
- Variable symmetry with constant frequency
- Auxiliary TTL/CMOS output
- 1000:1 frequency change by vernier or sweep voltage
- External frequency counter with up to seven digits of resolution covering 5Hz to 120MHz
