Remote Cable Test Adaptor

Product Images

Description

- The Model 100 Breakout Box and Cable Tester is a 100LED test set that accesses and monitors all 25 conductors of the RS-232-C, the new EIA-232-D and CCITT V.24 Interfaces between your DTE and DCE
- All four possible signal states (high, low, active or off) can be monitored using the 100 LEDs
- A set of 25 miniature switches allow individual circuits to be broken and cross-patched using the stackable patch leads
- RTS, CTS, DTR and DSR and a data crossover function can be controlled by 8 miniature switches without using patch cables
- Any 25 way cable can be tested by plugging the two ends into the Model 100
- All connections and shorts or open circuits can be monitored by watching the LEDs
- A remote cable test adaptor enables installed cables to be tested without disruption of the installation
