

International Data Sciences Inc. Interface Monitor and Breakout Box

Product Images

Description

- The Model 60 EIA Interface Monitor and Breakout Box can access all 25 conductors of the EIA RS-232-C and CCITT V.24 interfaces between the data terminal and the data modem
- Twelve LEDs monitor key EIA signals
- Two additional LEDs monitor any positive or negative signal and indicate whether or not it meets the EIA specifications
- Twenty-four miniature rocker switches allow you to interrupt each interface signal for testing or cross-patching with Piggy-back stacking jumpers (provided in the unit)
- You can also use the Model 60 to make prototypes of special cables, such as null-modem cables
- The model 60 comes in its own case and is powered by two AA size 1.2V NiCad batteries which provide 100 hours of continuous operation
