

Pelstor Rack Upright Protector Euro Type C

Product Images

Description

The Pelstor Rack Upright Protector Euro Type C offers excellent protection, with a tough outer shell made from highly resilient and hard wearing plastic. The Rack Upright Protector requires no fixtures or fittings, meaning no floor damage from drilling

- Shape and design of shell repels and deflects impact away from the upright
- Closed cell foam interior acts as a cushion between the racking and plastic shell
- Quick and easy installation – fitted by hand with no drilling required
- 600MM height standard
