

Pelstor Double Rail End of Aisle Barrier

Product Images

Description

The Pelstor Double Rail End of Aisle Barrier protects and conserves goods from any potentially damaging strikes from mechanical handling equipment. These Double Rail End of Aisle Barriers can take multiple impacts and reform to their original shape, due to the tough HDPE composition

- High impact absorption through unique foam interior, which eliminates any transferrable energy away from floor and prevents damage
- High visibility yellow colour ensure barriers are detectable to mechanical handling equipment operators
- Product reforms to original shape after impact
- 630MM high
- Two widths available
