

Amprobe LM100 Digital Light Meter

Product Images

Description

Amprobe have designed the LM-100 Digital Light Meter in order to provide a product that measures the illumination level of the interior, allowing for the monitoring of and reduction in energy consumption. The LM-100 Digital Light Meter accurately measures light, with readings available in both Foot Candle (fc) and Lumen (lux) for the user's convenience

- Protective sensor cap included
- Front panel switchable between lux and fc
- Measuring range: 200,000 lux/20,000 fc
- Manual ranging
- Silicone photodiode sensor and filter
- Data Hold to freeze reading on digital display
- Automatically powers off to save battery life
