

Bratts Ladders Double Extension Ladders

Product Images

Description

Bratts' Double Extension Ladders are designed for use in areas where minimum metal content is required. These Double Extension Ladders have a unique fixing of 30mm square fibre rungs which give a positive anti-twist connection whilst the steel stay brackets give extra strength and prevent any potential side sway

- Fitted special rubber blocks in channel section ends prevent chaffing
- Wall running wheels fitted to prevent wear
- Clever clutch design feature arrests itself rung by rung
- ANSI 14-5 and ESI 13-1
- Kitemarked BS EN 131
