

Solbest Electronic Solder Feed Guide Tubes

Product Images

Description

Modified Weller soldering irons. Solder is automatically fed through soldering iron body and dispensed at tip through a guide tube. This leaves the operators hands free to hold PCBs components etc. Wire flow is activated by a pro switch on the soldering iron handle

- For use with solder wire 0.7 - 1.2mm thick
- Units come complete with modified soldering iron, solder dispensing module, and solder guide tube
- Units powered by appropriate 24V Weller soldering stations
