

WAKU Telescopic Ladders

Product Images

Description

Waku Telescopic Ladders are designed to the highest safety and performance levels. They are recognised for their strength, versatility and compact design

- Corrugated non-slip rubber foot pads
- Rugged stainless steel pins reliably lock the sturdy, corrosion-proof aluminium hinges
- Double ladder: height-adjustable, rung by rung
- Single extending ladder: extends to almost four times its transport length
- Step ladder: with adjustable offset to cope with height differences in stairwells and on gradients
- Platform height (max step height) is a non-extended form
- Space-saving design for transport and storage
- Widening Kit required for telescopic ladders to meet the new European Standard EN131
- The WAKU Telescopic Ladder is also available with a variety of optional accessories including Hook-On-Platforms, Ladder Extension Legs and Wall Stand Off Attachments
