

Kontakt Plastik 70 Coating Spray

Product Images

Description

Kontakt Plastik 70 Coating Spray is the universal conformal coating for printed circuit boards (PCBs). Plastic 70 insulates and protects, preventing electrical leakages and short circuits

- Protects PCBs from humidity, electrical leakages, and short circuits
- Can provide extra insulation of coils and transformers
- Clear, solvent drying acrylic-based coating
- 200ml spray application
- Heat resistant
- In-built moisture warning: Shows a frosted appearance when applied to moisture
- Can be used as a universal protective coating on any surface such as metal, paper, paintings, furniture etc.
