

3M Cubitron II Fibre Disc

Product Images

Description

The 3M Cubitron II Fibre Disc features Precision Shaped Grain Technology, for exceptionally fast cutting with less pressure. Lasting up to twice as long as a conventional disc, the Cubitron II Fibre Disc is ideal for use in machinery manufacturing, metal fabrication, metalworking and more

- 982C heavy duty disc
- Triangular shaped ceramic grain wears evenly and runs cool, for optimum mineral breakdown
- Highly durable and tear resistant due to stiff fibre backing and strong resin bond
- Centre hole attachment type
- Reduced grinding pressure minimises operator fatigue
- Closed coat
- Suitable for high pressure weld grinding, removing carbon steel welds and various other applications
- 115mm x 22mm
