

Lakeland MicroMax Coverall

Product Images

Description

The Lakeland MicroMax Coverall has been designed with functionality, comfort and safety in mind. Featuring tougher fabric for more challenging applications, the MicroMax Coverall boasts an additional scrim between its layers to add strength and durability yet is flexible and comfortable to wear. The MicroMax Coverall features elasticated ankles, waist, hood as well as cuffs with thumb loops

- Type 5 & 6 Coverall
- Three-piece hood for a better fit
- Ergonomic design with inset sleeves and two-piece crotch gusset
- High moisture vapour transmission rate
- Ideal for many cleanroom applications due to non-lint surface and taped seams
- Stitched and bound exterior seams to improve strength and particle filtration at seams
- EN 6530 compliant - Sulphuric Acid 30% CAS No. 67-64-1 (R 3, P 3), Sodium Hydroxide CAS No. 1310-73-2 (R 3, P 3), O-Xylene CAS No. 75-15-0 (R 3, P 2), Butanol CAS No. 75-09-2 (R 3, P 2)
- EN 14126 compliant – Test No. ISO 16604:2004, ISO 22611:2003, ISO 22612:2005, EN 14126:2003 Annex A
- Note only garments with sealed seams such as MicroMax TS are recommended for use in biological hazards
- Individually packaged
