

Kontakt Chemie Dust Off 67

Product Images

Description

Kontakt Chemie Dust Off 67 is a high quality, non-flammable, liquified gas that removes dust and debris without causing damage to delicate electronic components. Dust Off 67 is suitable for printed circuit boards and precision instruments as well as laboratory, communication and data processing equipment

- High pressure, inert, liquefied gas based on HFO
- Prevents electronic component errors caused by microscopic dust
- Designed to have a low long-term environmental impact
- GWP 7
- Vapour pressure (20C): 420kPa
- Tests results according to directive 2008/47/EC: non-flammable
- 200ml
