

Delvo Series 30 Brushless Electric Screwdriver

Product Images

Description

Brushless Motor Electric Screwdrivers from Delvo with built-in brushless motors. Delvo electric screwdrivers are of high quality for professional use. Always applying the correct amount of torque, the Delvo electric screwdriver guarantees accuracy.

- First in a three part series of Brushless Motor Electric Screwdrivers from Delvo
- Incorporates long-life brushless motors for long life and less maintenance
- Designed to minimise loss of screw fastening torque, ensuring a stable performance
- Available in push-to-start or lever start models in three different speeds
- The push-to-start model is suitable for continuous screw tightening whilst the lever start model is more apt for temporary tightening screws and tightening screws set at angles
- Equipped with a clear plastic torque adjustment ring cover
- Torque: .4 - 3.0 Nm
- Input voltage: 40 V DC
- Machine screw size: 2.6-5.0mm
- Tapping screw size: 2.5-4.0mm
- Weight: 720g
- Conforms to CE standards
