

EFD Smoothflow™ Barrel Pistons

Product Images

Description

The EFD Smoothflow™ Barrel Pistons are reliable polyethylene pistons ideal for preventing dripping and oozing, and containing hazardous fumes

- Polyethylene pistons ensure constant dispensing force prevents dripping or oozing
- Contains hazardous fumes
- Empties all fluid from the barrel
- White PE double-wiper piston is suitable for most thick to thin fluids
- Blue LV barrier is suitable for watery, thin fluids such as solvents and cyanoacrylates
- Orange SPE piston is suitable for dispensing thick, stringy materials
