

Ansell ActivArmr 43-113 Heat Resistant Gloves

Product Images

Description

The Ansell ActivArmr 43-113 Heat Resistant Gloves offer superior heat and flame resistance. Made with Dupont Kevlar outer yarn, the ActivArmr Heat Resistant Gloves are resistant to contact, convective and radiant heat

- Glove shell will not melt, drip or propagate a flame
- Long knitwrist cuff offers enhanced wrist protection
- Designed for intermittent handling of dry hot objects – up to 350°C / 660°
- Outstanding cut resistance to EN level 5 and level E
- Cotton inner liner – absorbent and comfortable to wear
- Previously known as Ansell Mercury 43-113
- Suitable for use in machinery and equipment industries
