

QTEK Stencil Cleaning Rolls - DEK

Product Images

Description

QTEK's Stencil Cleaning Rolls - DEK have been designed specifically for ASM DEK Printing machines, and are available in both Cleanmaster, and Micro-Fine Pitch material. The DEK Stencil Cleaning Rolls are ideal for absorbing paste, solvents and adhesives, and leave stencils perfectly clean while increasing yield

- Available in Cleanmaster material, a non-woven extra strength material that boasts excellent wetting characteristics
- Available in Micro-Fine Pitch material, a unique polypropylene construction with a micro hole structure which improves the cleaning performance, reduces the solvent usage and the number of cleaning cycles required to effectively clean the stencil
- Manufactured for ASM DEK printing machines
- Core material: Perspex
- Ideal for absorbing paste, solvents and adhesives
- Extremely low linting and highly durable
- Leaves stencils clean and increases yield
- Antistatic packaging
- Roll length: 11M
- Core length: 530MM
- Available widths: 515MM and 400MM
