

Abeco Fibre Optic Kevlar Strippers

Product Images

Description

- AB Kevlar Strip is a lever action hand tool designed to remove the protective sleeving from fibre optic bundles
- The tool has two adjustable cutting blades. The depth of the cut is regulated by knurled blade adjusters, which allow variable blade penetration from 0-3mm
- AB Opti-Strip comprises of two blades mounted on spring loaded tensioning arms on either side of a hollow spindle
- Depth of cut is changeable by adjustable nut; once set it may be permanently locked in position
- AB Silicon Strip is designed to remove the silicon protection from the glass filament. Its special handle automatically regulates the pressure exerted on the fibre
