

Aim-TTi PL DC Power Supply Quad Mode Triple

Product Images

Description

The Aim-TTi PL DC Power Supply Quad Mode Triple is the same as TTPL303 as it has two identical outputs, but also an additional output of 0 to 6V at 0 to 8A. The PL DC Power Supplies boast a higher energy efficiency than other PSUs, as well as precision metering for reduced uncertainty

- S-Lock function for instant lock settings
- V-Span function for customised voltage range
- Easy-switch remote or local voltage sensing
- Low current range and current meter averaging
- DC output switch and 'view limits' button
- Linear regulation for the best performance
- Ultra-compact design
- Safety binding-post connection terminals
- Independent, tracking and parallel modes on Dual models
- Voltage / Current Range:
- Two identical outputs as per PL303 - 0V-30V/1mA-3A - plus output of 0V-6V at 0 to 8A
